NOVUS ENTERPRISE APPLICANT TRACKING SYSTEM

Deliverable 9: UI/UX Wireframe Concepts & Interface Mockup Specifications

Document Reference:	ATS-BA-DOC-009	**Author / Role:**	Lead Business Systems Analyst
Standard:	Nielsen Norman Usability Heuristics & WCAG 2.1 AA	**Status:**	Approved for Baseline (v1.0)

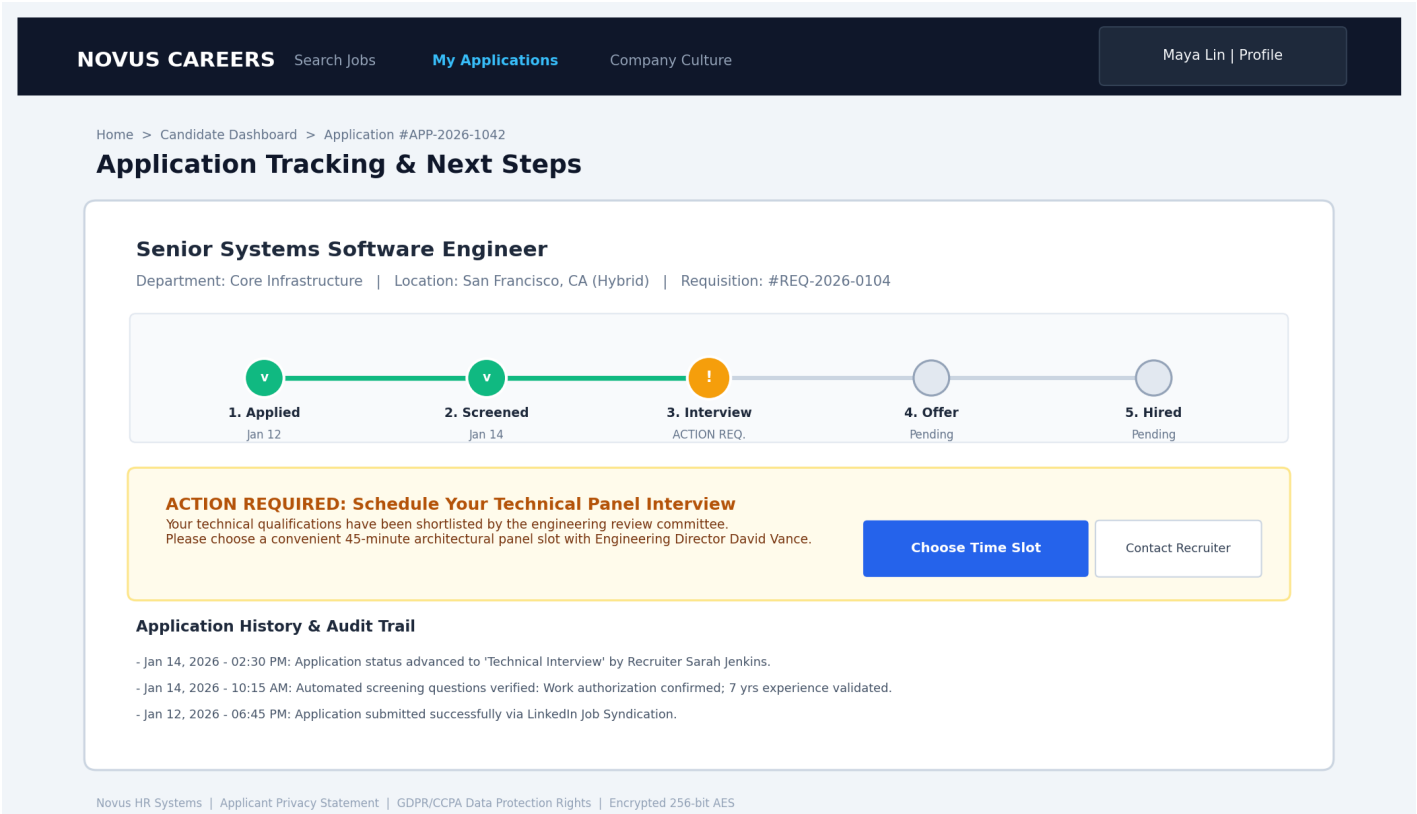

1. Design Principles & Role-Based UX Architecture

The ATS user experience is engineered to eliminate the communication gaps, high candidate abandonment (38%), and recruiter cognitive fatigue identified in the AS-IS operational state. Interfaces are partitioned into three specialized, purpose-built personas:

Persona	Core User Goal	Primary Design Heuristic	Target Task Metric
Candidate (Maya Lin)	Submit application frictionlessly and track live progress 24/7.	Visibility of System Status (#1) & Aesthetic Minimalism (#8).	Application completion time < 5 mins; Zero inquiry emails.
Recruiter (Sarah Jenkins)	Filter, evaluate, and advance talent pipelines with bulk actions.	Flexibility & Efficiency of Use (#7) with Kanban velocity.	Screening review time < 90 secs per candidate.
Hiring Manager (David Vance)	Review structured dossiers and submit rubric ratings.	Consistency and Standards (#4) & Error Prevention (#5).	Scorecard turnaround < 24h via mobile or desktop.

2. Candidate Experience: Career Portal & Application Tracker

Objective: Deliver total transparency into application status, direct calendar integration for self-service scheduling, and frictionless document management to eliminate candidate ghosting.

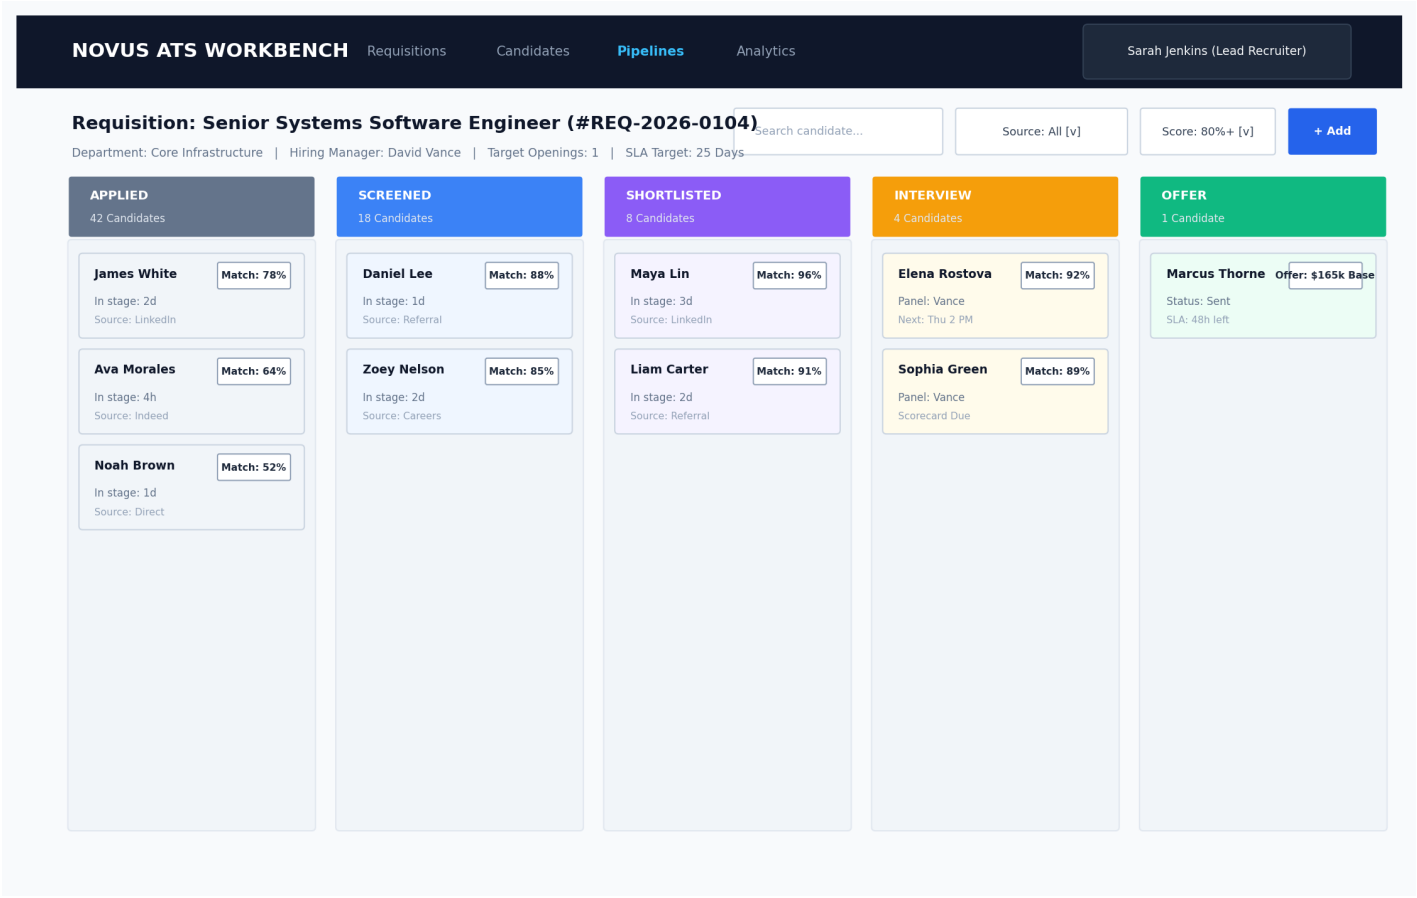

Key Functional Features & UI Annotations:

- **Visual 5-Stage Gate Progress Tracker:** Real-time synchronization displaying exact active status with date stamps and pulse indicator.
- **Action-Required Notification Banner:** Context-sensitive call-to-action allowing immediate self-service panel interview slot booking.
- **Transparent Audit Trail:** Detailed timestamps informing the candidate of recruiter actions and OCR document verification.
- **GDPR / CCPA Self-Service:** In-app rights management permitting 1-click personal data export or profile erasure.

3. Recruiter Experience: Interactive Kanban Pipeline Dashboard

Objective: High-density desktop workspace enabling recruiters to manage 50+ active applicants across multi-stage funnels via drag-and-drop, automated AI match scoring, and quick filters.

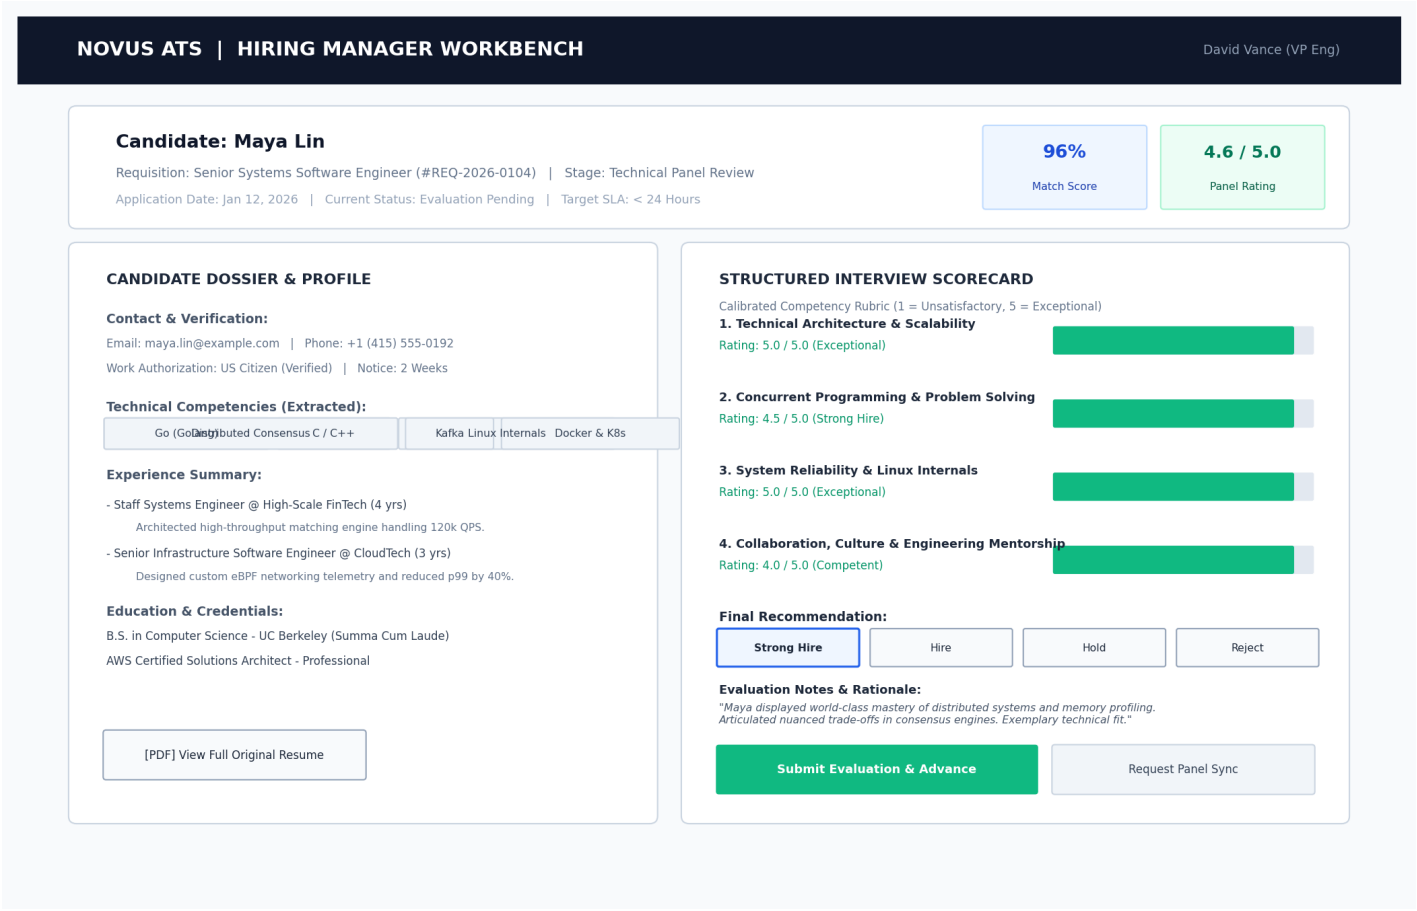

Key Functional Features & UI Annotations:

- **Multi-Column Visual Pipeline:** Real-time candidate counts and status cards (Applied, Screened, Shortlisted, Interview, Offer).
- **Algorithmic Match Scoring Pill:** Visual match percentages (e.g., 96%, 88%) computed against requisition required skills.
- **SLA & In-Stage Aging Counters:** Automatic visual flags highlighting candidates idling past defined SLA thresholds.
- **Multi-Source Tagging:** Immediate identification of sourcing channel (LinkedIn, Referral, Careers, Indeed) for source optimization.

4. Hiring Manager Experience: Standardized Evaluation Scorecard

Objective: Eliminate subjective hiring bias and interview feedback delays with a calibrated 1-to-5 competency rubric, pre-populated candidate dossier, and one-click recommendation capture.

Key Functional Features & UI Annotations:

- **Dual-Pane Review Architecture:** Candidate work history, verified skills, and original resume displayed alongside the rating form.
- **Calibrated 1-5 Competency Rubric:** Strict behavioral anchors for Technical Architecture, Problem Solving, and Collaboration.
- **Clear Recommendation Radios:** Mandatory selection (Strong Hire, Hire, Hold, Reject) preventing ambiguous verbal feedback.
- **Mobile-First Optimization:** Form designed for rapid 2-minute completion on mobile smartphones immediately following interviews.

5. Usability Metrics & Design System Token Specifications

To ensure high adoption across non-technical hiring managers and high-velocity talent teams, the design adheres to strict usability benchmarks and enterprise design tokens:

Category	Specification / Token	Target Benchmark / Value
Typography	Inter / System Sans-Serif font family (12pt body, 16pt h2, 24pt h1)	Optimal legibility across high-density desktop & mobile.
Color Palette	Primary Navy (#0F172A), Action Blue (#2563EB), Success (#10B981), Warning (#F59E0B)	Contrast ratio > 4.5:1 meeting WCAG 2.1 Level AA.
System Usability (SUS)	Standardized 10-question System Usability Scale post-pilot survey	Target SUS Score >= 85 (Grade A+ Industry Standard).
Accessibility	Full keyboard navigation, ARIA landmarks, screen reader alt tags	100% WCAG 2.1 AA certified compliance.
